Vim Cheat Sheet

Vim Cheat Shee	•	
Global	Editing	Macros
:h[elp] keyword - open help for keyword	r - replace a single character.	qa - record macro a
:sav[eas] file - save file as	R - replace more than one character, until ESC is pressed.	q - stop recording macro @a - run macro a
:clo[se] - close current	J - join line below to the	@@ - rerun last run macro
	current one with one space in between	Cut and paste
:ter[minal] - open a terminal window	gJ - join line below to the	yy - yank (copy) a line
K - open man page for word under the cursor	current one without space in between	2yy - yank (copy) 2 lines
cursor movement	gwip - reflow paragraph	yw - yank (copy) the characters of the word from the cursor position to the start of the next word
h - move cursor left	g∼ - switch case up to motion	
j - move cursor down	gu - change to lowercase up to motion	yiw - yank (copy) word under the cursor
k - move cursor up	gU - change to uppercase up	yaw - yank (copy) word under the cursor and the space after or before it
1 - move cursor right	to motion	
gj - move cursor down (multi-line text)	CC - change (replace) entire line	y\$ or Y - yank (copy) to end
gk - move cursor up (multi- line text)	c\$ or C - change (replace) to the end of the line	of line p - put (paste) the clipboard
H - move to top of screen	Ciw - change (replace) entire	after cursor
M - move to middle of screen	word	P - put (paste) before cursor
L - move to bottom of screen	CW or Ce - change (replace) to the end of the word	gp - put (paste) the clipboard after cursor and leave cursor
W - jump forwards to the start of a word	S - delete character and substitute text (same as cl)	after the new text gP - put (paste) before cursor
W - jump forwards to the start of a word (words can contain	S - delete line and substitute text (same as cc)	and leave cursor after the new text
punctuation)	xp - transpose two letters	dd - delete (cut) a line
e - jump forwards to the end of a word	(delete and paste)	2dd - delete (cut) 2 lines
oi a word		
F ' C 1 1 1	u - undo	dw - delete (cut) the
of a word (words can contain	U - restore (undo) last changed line	dw - delete (cut) the characters of the word from the cursor position to the start of the next word
of a word (words can contain punctuation) b - jump backwards to the	U - restore (undo) last changed line Ctrl + r - redo	characters of the word from the cursor position to the start
of a word (words can contain punctuation) b - jump backwards to the start of a word	U - restore (undo) last changed line	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode)	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank)	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: 'O', '{}', '[]' - use: h matchpairs in vim for more	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of marked area Ctrl + V - start visual block	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use : h matchpairs in vim for more info) 0 - jump to the start of the	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode o - move to other end of marked area Ctrl + v - start visual block mode O - move to other corner of	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: 'O', '{}', '[]' - use: h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank	U - restore (undo) last changed line Ctrl + r - redo - repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of marked area Ctrl + v - start visual block mode O - move to other corner of block	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use : h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line	U - restore (undo) last changed line Ctrl + r - redo repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of marked area Ctrl + v - start visual block mode O - move to other corner of block aw - mark a word ab - a block with {}	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line x - delete (cut) character
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use :h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line \$ - jump to the end of the line	U - restore (undo) last changed line Ctrl + r - redo	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line x - delete (cut) character Indent text >> - indent (move right) line one shiftwidth << - de-indent (move left) line
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use :h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line \$ - jump to the last non-blank character of the line	U - restore (undo) last changed line Ctrl + r - redo repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of marked area Ctrl + v - start visual block mode O - move to other corner of block aw - mark a word ab - a block with {}	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line x - delete (cut) character Indent text >> - indent (move right) line one shiftwidth << - de-indent (move left) line one shiftwidth
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use: h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line \$ - jump to the last non-blank character of the line g jump to the last non-blank character of the line	U - restore (undo) last changed line Ctrl + r - redo repeat last command Marking text (visual mode) V - start visual mode, mark lines, then do a command (like y-yank) V - start linewise visual mode O - move to other end of marked area Ctrl + v - start visual block mode O - move to other corner of block aw - mark a word ab - a block with () aB - a block with {} at - a block with ()	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line x - delete (cut) character Indent text >> - indent (move right) line one shiftwidth << - de-indent (move left) line
E - jump forwards to the end of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{\}', '[]' - use :h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line \$ - jump to the last non-blank character of the line g jump to the last non-blank character of the line g go to the first line of the document G - go to the last line of the document	U - restore (undo) last changed line Ctrl + r - redo	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line X - delete (cut) character Indent text >> - indent (move right) line one shiftwidth << - de-indent (move left) line one shiftwidth >% - indent a block with () or
of a word (words can contain punctuation) b - jump backwards to the start of a word B - jump backwards to the start of a word (words can contain punctuation) ge - jump backwards to the end of a word gE - jump backwards to the end of a word (words can contain punctuation) % - move cursor to matching character (default supported pairs: '()', '{}', '[]' - use: h matchpairs in vim for more info) 0 - jump to the start of the line ^ - jump to the first non-blank character of the line \$ - jump to the last non-blank character of the line g go to the first line of the document G - go to the last line of the	U - restore (undo) last changed line Ctrl + r - redo	characters of the word from the cursor position to the start of the next word diw - delete (cut) word under the cursor daw - delete (cut) word under the cursor and the space after or before it :3,5d - delete lines starting from 3 to 5 :g/{pattern}/d - delete all lines containing pattern :g!/{pattern}/d - delete all lines not containing pattern d\$ or D - delete (cut) to the end of the line x - delete (cut) character Indent text >> - indent (move right) line one shiftwidth << - de-indent (move left) line one shiftwidth >% - indent a block with () or {} (cursor on brace) <% - de-indent a block with ()

Working with multiple files :e[dit] file - edit a file in a new buffer :bn[ext] - go to the next buffer :bp[revious] - go to the previous buffer :bd[elete] - delete a buffer (close a file) :b[uffer]# - go to a buffer by index # :b[uffer] file - go to a buffer by file :1s or :buffers - list all open buffers :sp[lit] file - open a file in a new buffer and split window :vs[plit] file - open a file in a new buffer and vertically split window :vert[ical] ba[11] - edit all buffers as vertical :tab ba[11] - edit all buffers as tabs Ctrl + ws - split window Ctrl + wv - split window vertically Ctrl + ww - switch windows Ctrl + wq - quit a window Ctrl + wx - exchange current window with next one Ctrl + w= - make all windows equal height & width Ctrl + wh - move cursor to the left window (vertical split) Ctrl + wl - move cursor to the right window (vertical split) Ctrl + wj - move cursor to the window below (horizontal split) Ctrl + wk - move cursor to the window above (horizontal split) Ctrl + wH - make current window full height at far left (leftmost vertical window) Ctrl + wL - make current window full height at far right (rightmost vertical window) Ctrl + wJ - make current window full width at the very bottom (bottommost horizontal window) Ctrl + wK - make current window full width at the very top (topmost horizontal window) **zf** - manually define a fold up to motion zd - delete fold under the cursor za - toggle fold under the cursor **zo** - open fold under the cursor zc - close fold under the cursor zr - reduce (open) all folds by one level **zm** - fold more (close) all folds by one level **zi** - toggle folding functionality \cline{black} c - jump to start of next change [c - jump to start of previous change do or :diffg[et] - obtain (get) difference (from other buffer)

dp or :diffpu[t] - put difference (to other buffer)
:diffthis - make current window part of diff

Vim Cheat Sheet https://vim.rtorr.com/

1 '	Cheat Sheet	
	gd - move to local declaration	> - shift text right
	gD - move to global declaration	< - shift text left
	fx - jump to next occurrence	y - yank (copy) marked t
	of character x	d - delete marked text
	tx - jump to before next occurrence of character x	~ - switch case
	Fx - jump to the previous occurrence of character x	u - change marked text to lowercase
	Tx - jump to after previous occurrence of character x	U - change marked text to uppercase
	; - repeat previous f, t, F or T movement	Registers :reg[isters] - show registers content
	, - repeat previous f, t, F or T movement, backwards	"xy - yank into register
	} - jump to next paragraph (or function/block, when editing code)	"xp - paste contents of register x
	{ - jump to previous paragraph (or function/block, when editing code)	"+y - yank into the syste clipboard register
	zz - center cursor on screen	"+p - paste from the syst clipboard register
	zt - position cursor on top of the screen	Marks and positions :marks - list of marks
	zb - position cursor on bottom of the screen	ma - set current position mark A
	Ctrl + e - move screen down one line (without moving cursor)	`a - jump to position of A
	Ctrl + y - move screen up one line (without moving	y`a - yank text to position mark A
	cursor)	` 0 - go to the position who Vim was previously exite
	<pre>Ctr1 + b - move screen up one page (cursor to last line)</pre>	" - go to the position w
	Ctrl + f - move screen down one page (cursor to first line)	last editing this file • - go to the position of
	Ctrl + d - move cursor and screen down 1/2 page	last change in this file - go to the position be
	Ctrl + u - move cursor and screen up 1/2 page	the last jump :ju[mps] - list of jump
	Insert mode - inserting/appending text	CCI I I I go to newer
	$oldsymbol{i}$ - insert before the cursor	position in jump list Ctrl + o - go to older
	I - insert at the beginning of the line	position in jump list
	a - insert (append) after the	: changes - list of chan
	A - insert (append) at the end	g, - go to newer position change list
	of the line	g; - go to older position change list
	o - append (open) a new line below the current line	Ctrl +] - jump to the t
	0 - append (open) a new line above the current line	
	ea - insert (append) at the end of the word	
	Ctrl + h - delete the character before the cursor during insert mode	
	Ctrl + w - delete word before the cursor during insert mode	
	Ctrl + j - add a line break at the cursor position during insert mode	
e a	,	

> - shift text right	>at - indent a block with <> tags	
< - shift text left	3== - re-indent 3 lines	
y - yank (copy) marked text	=% - re-indent a block with () or {} (cursor on brace)	
d - delete marked text ∼ - switch case	=iB - re-indent inner block with {}	
u - change marked text to	gg=G - re-indent entire buffer	
lowercase U - change marked text to]p - paste and adjust indent to current line	
uppercase	Exiting	
Registers :reg[isters] - show registers content	: W - write (save) the file, but don't exit	
" xy - yank into register x	:w !sudo tee %-write out the current file using sudo	
" xp - paste contents of register x	:wq or :x or ZZ - write (save) and quit	
"+y - yank into the system clipboard register	: q - quit (fails if there are unsaved changes)	
"+p - paste from the system clipboard register	:q! or ZQ - quit and throw away unsaved changes	
Marks and positions :marks - list of marks	: wqa - write (save) and quit on all tabs	
ma - set current position for mark A	Search and replace /pattern - search for	
`a - jump to position of mark A	?pattern - search backward for pattern	
y`a - yank text to position of mark A	\vpattern - 'very magic' pattern: non-alphanumeric characters are interpreted as special regex symbols (no escaping needed) n - repeat search in same direction N - repeat search in opposite direction	
O - go to the position where Vim was previously exited		
" - go to the position when last editing this file		
• - go to the position of the last change in this file		
- go to the position before the last jump	:%s/old/new/g - replace all old with new throughout	
: ju[mps] - list of jumps Ctrl + i - go to newer	file :%s/old/new/gc - replace	
position in jump list Ctrl + o - go to older	all old with new throughout file with confirmations	
position in jump list	:noh[lsearch] - remove highlighting of search	
: changes - list of changes	matches	
g , - go to newer position in change list	Search in multiple files :vim[grep] /pattern/	
g; - go to older position in change list	{`{file}`} - search for pattern in multiple files	
Ctrl +] - jump to the tag under cursor	:cn[ext] - jump to the next match	
	:cp[revious] - jump to the previous match	
	:cope[n] - open a window containing the list of matches	
	:ccl[ose] - close the quickfix window	
	Tabs	
	:tabnew or :tabnew {page.words.file} - open a file in a new tab	
	Ctrl + wT - move the	

:dif[fupdate] - update differences

:diffo[ff] - switch off diff mode for current window

- Ctrl + t indent (move
 right) line one shiftwidth
 during insert mode
- **Ctrl** + **d** de-indent (move left) line one shiftwidth during insert mode
- **Ctrl** + **n** insert (autocomplete) next match before the cursor during insert mode
- **Ctrl** + **p** insert (autocomplete) previous match before the cursor during insert mode
- Ctrl + rx insert the contents of register x
- **Ctrl** + **ox** Temporarily enter normal mode to issue one normal-mode command x.
- $\begin{tabular}{ll} \textbf{Esc} \ or \ \textbf{Ctrl} + \textbf{c} exit \ insert \\ mode \end{tabular}$

- current split window into its own tab
- gt or :tabn[ext] move
 to the next tab
- gT or :tabp[revious] move to the previous tab
- #gt move to tab number #
- :tabm[ove] #-move current tab to the #th position (indexed from o)
- :tabc[lose] close the current tab and all its windows
- :tabo[nly] close all tabs
 except for the current one
- :tabdo command run the command on all tabs (e.g. :tabdo q closes all opened tabs)
